

# Statement of Compliance

## Restriction of Hazardous Substances (RoHS): Directive 2002/95/EC

All semiconductor devices assembled in lead-free packages provided by Asahi Kasei Microdevices Corporation (AKM) are fully compliant with RoHS.

These lead-free products:

1. Contain less than 1000ppm of Pb, Hg, CR+6, PBB, and PBDE, and less than 100ppm of Cd.
  - a. None of these substances are intentionally included.
2. Have outer lead plating that contains less than 1000ppm of Pb, and no intentionally included Pb.

Upon request, AKM can provide measurement data of hazardous substances for particular devices.

RoHS compliant products from AKM are identified with "Pb free" letter indications on the product label posted on the anti-static bag and the inner box.

All products are Pb-free, whether or not the ordering part number includes the "P" indicator. The devices themselves are not marked with a "P" indicator.
